SAFETY INSTRUCTIONS

Please read the safety instructions carefully before using the product for the first time and keep the instructions for future reference.

1. Warning: This product has a built-in lithium polymer battery.
2. Do not expose this product to rain or damp conditions. Product is not waterproof.
3. Regularly clean and empty dust filter to avoid abnormal function.
4. Do not vacuum flammable or explosive substances (liquids, gases).
5. Never vacuum sharp elements.
6. Keep the product out of reach of children and pets to avoid chewing and swallowing.
7. Prevent this item from falling as it could cause serious damage.
8. Product operating and storage temperature is from 0 degrees Celsius to 40 degrees Celsius. Under and over this temperature might affect the function.
9. Never open the product battery compartment. Touching the inside electric parts can cause electric shock. Repairs or service should only be performed by qualified personnel.
10. Do not place this item near sources of water, heat or expose to direct sunlight.
11. This item is intended for household use only.
12. Do not use non-original accessories together with the product as this can make the product functionality abnormal.

ENG 1

1. HEPA filter
2. Vacuum Head
3. On/off button
4. Charging Indicator
5. USB-C Charging port
6. Blowing head
7. Used for vacuum head: Long flat suction nozzle
8. Used for blowing head: Long round Air nozzle, Round Brush Nozzle, Blow nozzle, Air inflatable nozzle

Charging:
Use the USB-C charging cable provided for charging. Connect the USB cable to a suitable power supply and connect the other end of the cable into the charging port of the product. During the charging process, the charge indicator will remain red. When the charging process is complete, it will turn green.

ENG 2

Important note: The product needs to be fully charged to work as intended. If the product has very low power the suction and blowing effect won't be as effective.

Installation and operation:
Attach the Vacuum head (with the HEPA filter inside) to the vacuum cleaner by turning it to the right until you hear a click. There is indicated on the product where to turn the vacuum head in.

Place the desired accessory on the vacuum cleaner head or on the blowing head and press the On/Off button to turn it on. When finish, press the button again to turn it off.

You can't use both the blowing effect and the suction effect at the same time, so please only use one function at a time.

Vacuum function is used for minor household and car cleaning appliances and so is the blowing function. The filter can store up to 200ML - Empty and clean the dust bin regularly.

Note: The suction and blowing speed depend on the battery charge. So it is recommended to fully charge the battery every time before use.

Disassembly and cleaning:

1. Turn the tank to the left to separate it from the vacuum cleaner.
2. Remove the filter from the tank and dispose of the dirt in the trash.

ENG 3

3. If necessary, use a slightly damp cloth or disposable tissue to clean the tank. The filter can be rinsed with water and must be completely dry before reusing.
4. To reinstall the tank, place the filter inside and turn it right until you hear a click.

Please notice - All products are subject to change without any notice. We take reservations for errors and omissions in the manual.

Electric and electronic equipment and included batteries contains materials, components and substances that can be hazardous to your health and the environment, if the waste material (discarded electric and electronic equipment and batteries) is not handled correctly.

Electric and electronic equipment and batteries is marked with the crossed out trash can symbol, seen above. This symbol signifies that electric and electronic equipment and batteries should not be disposed of with other household waste, but should be disposed of separately.

As the end user it is important that you submit your used batteries to the appropriate and designated facility. In this

ENG 5

manner you make sure that the batteries are recycled in accordance with legislature and will not harm the environment.

All cities have established collection points, where electric and electronic equipment and batteries can either be submitted free of charge at recycling stations and other collection sites, or be collected from the households. Additional information is available at the technical department of your city.

Information on standby/off mode power consumption and power management for products compliant with Commission Regulation (EU) 2023/826 can be found at the following internet address: denver.eu and then click the search ICON on topline of website. Write model number: HVC-45 and enter the page.
